Software Modeling and Design
COMP 3700
Homework #2
Maximum points: 50
(Team Assignment)

Note: Submit a single pdf document on behalf of entire team.

Question (50 Points):

Research on the project problem provided to your team. Provide a detailed description of problem (**2-3** pages, single-spaced). Include as much detail as available. The report should include detailed description of **at least 10 top-level use cases and relevant information**. Include information regarding potential **users** of the system and the way they are expected to **interact** with the system.
